Sustainable Futures through Innovative Education

STEAMing Ahead

STEAMing Ahead is an Erasmus project that strengthens STEAM education through sustainability, digital innovation, and gamification to responds to gaps in teachers' readiness to teach climate change, sustainability, and digitally enhanced STEAM subjects.

The project addresses key challenges in European education by strengthening teachers' capacity to integrate sustainability, climate education, and digital skills into everyday classroom practic.

ABOUT

STEAMing Ahead

Project objectives

Through a strong partnership of European schools and education organizations, STEAMing Ahead develops:

- STEAM & Sustainability Competence Framework aligned with EU standards,
- free MOOC and Teacher Guidebook for professional development,
- game-based STEAM Escape Games focused on real-world sustainability challenges,
- inclusive, open-access digital platform for collaboration and resource sharing.

The project combines gamification, digital tools, and hands-on learning to increase student engagement, support inclusive education, and prepare young people for green and digital futures. Designed for long-term impact, all project results remain freely available and scalable beyond the project's lifetime.
